

iCode enables users to code/analyze research projects, RFI responses, and other text datasets for reporting and decision-making.

Why Use iCode?

- Standardize portfolio curation
- Support collaborative analysis
- Accelerate reporting and insights
- Create reusable research projects
- Reduce spreadsheet-based workflows

Key Capabilities

Create & Manage Projects

- ✓ Save searches
- ✓ Combine datasets
- ✓ Share projects
- ✓ Search and filter

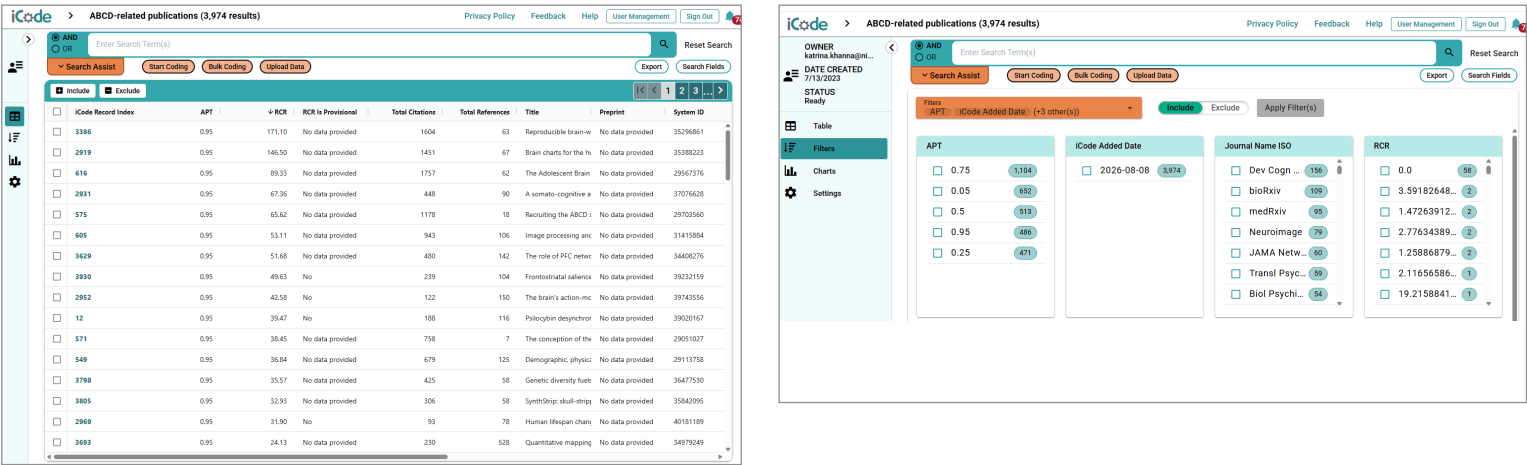

Code & Curate Data

- ✓ Custom fields
- ✓ Manual coding
- ✓ Multi-curator
- ✓ Import codes

Standardize with Vocabulary

- ✓ Shared vocabularies
- ✓ Consistent coding
- ✓ Reproducible analyses

Example Workflow

Create projects → Apply coding frameworks → Analyze results
